

We are looking for a **Frontend Developer**

Who we are

We are a team of highly committed researchers aiming to harness the vast powers of Artificial Intelligence to solve distinct problems and make it available to Industries. Founded in 2022 and backed by leading investors and industry practitioners, we are experts at combining human intelligence with artificial intelligence to build custom solutions for each of our clients.

What you'll be doing

You will be developing new feature components, determining the structure and design of web pages, building reusable codes, optimizing page loading times, and using a variety of markup languages to create the web pages. Which includes exciting work on 3-d libs.

You will be responsible for...

- Researching on UI/UX designs.
- Stay up-to-date on emerging technologies.
- Building reusable components for future use.
- Striking a balance between functional and aesthetic design.

What skills & experience you'll bring to us

- **Web Languages** - HTML, CSS, JS, JQUERY.
- **Frameworks/libs** - Vue.js (Primary) , React, Flutter, any 3-D library.
- **CSS** - Tailwind, Bootstrap, Chakra UI.
- **Protocols** - RESTFUL API, Websockets (API Consumption).
- **Cloud** - AWS.

Note: Hands On experience is mandatory for this role and should be proven with projects (Github, portfolio). Additional skills are always plus and will affect the outcome of the interview.

Want to apply? Get in touch today

This role demands you to be in the physical location which will be in Hyderabad for now. Send your resume/cv to careers@visnetai.co. Check us out here: <https://visnetai.co>

We are looking for a **Backend Developer**

Who we are

We are a team of highly committed researchers aiming to harness the vast powers of Artificial Intelligence to solve distinct problems and make it available to Industries. Founded in 2022 and backed by leading investors and industry practitioners, we are experts at combining human intelligence with artificial intelligence to build custom solutions for each of our clients.

What you'll be doing

You will work with Front-end developers to integrate user-facing elements with server-side logic, developing new feature components, building reusable codes. Gather and address technical and design requirements. Participate in the entire application lifecycle, focusing on coding and debugging.

You will be responsible for...

- Write clean code to develop functional web applications.
- Develop and oversee testing schedules in client server environment.
- Stay up-to-date on emerging technologies.
- Produce quality code, raising the bar for team performance and speed.

What skills & experience you'll bring to us

- **Programming Languages** - Python(>=3.8), Java Script.
- **Frameworks/libs** - Flask, Django, Express.js, FastAPI.
- **Databases** - MongoDB, redis, Postgresql.
- **Authorization standards** - JWT, RSA, Hashing+salt.
- **Protocols/Servers** - API, Websockets, Nginx, Traefik(Optional).
- **Scaling/Testing** - AWS, Docker, Jenkins.

Note: Hands On experience is mandatory for this role and should be proven with projects (Github, portfolio). Additional skills are always plus and will affect the outcome of the interview.
